

## Mobipocket Viewer on the iLiad

With the Mobipocket viewer on your iLiad you can read eBooks and eNews (RSS feeds generated by the Mobipocket Desktop Reader) in the popular Mobipocket format.

The Mobipocket Desktop Reader also works seamless with the iLiad. Simply install the latest Mobipocket Desktop Reader on your PC, connect your iLiad and transfer your eBooks and eNews directly on to your iLiad.

For full compatibility we recommend that all existing Mobipocket Reader users update to the latest version (version 6.0 Build 580 – released May 3<sup>rd</sup>). You can download the latest Mobipocket Reader for free [here](#).

## Mobipocket Viewer

-  Table of Content\*: With the Table of Content you can quickly navigate through the document
-  Begin Reading\*: Go the beginning of the book to start reading.
-  Back: Go back to the previous location in the document.
-  Increase font size: Increase the font size of the document to suit your reading comfort. The text will automatically reflow.
-  Decrease font size: Decrease the font size of the document to suit your reading comfort. The text will automatically reflow.

iRex Technologies will continue to improve the Mobipocket reading experience on the iLiad and will introduce additional features (like the Mobipocket dictionary support) in upcoming software releases.

\* Feature only available if supported by the content.

## How to download this software

- Connect to the iDS by pressing the connect key of your iLiad for 2 seconds.
- After connecting to the server you will get the message **Downloading Mobipocket Viewer**.
- When the download is complete the iLiad will automatically restart itself and you can continue to work with the iLiad.

## Technical Support

If you experience any problem with the installation please contact our Techsupport Centre.
