## 1 Preface:

These Release Notes cover what is new in the software release 2.10 and provide the download and installation instructions.

The software release is part of an ongoing process to extend the functionalities of the iLiad and to improve the overall performance to ensure an even better electronic reading experience for our customers.

The release notes of previous software versions can be found on the download section of our website:

<http://www.irextechnologies.com/downloads/docs>

## **2 What's new in the software release 2.10?**

### ***2.1 WPA secured wireless connection***

- You can now connect to a WPA (WiFi Protected Access) secured wireless network. For more details, see the v2.10 User Manual.

### ***2.2 Ability to define the archive locations***

- The 4 archive keys (NEWS, BOOKS, DOCS and NOTES) are individually redefinable to a memory type (Internal memory, CF-card, MMC-card and USB-stick)
- Downloaded items from iDS are also redirected to these memory types

### ***2.3 Bug fixes***

- Improvements made on the stability of the PDF-viewer

### ***2.4 Image quality***

- In some cases, an improved image quality can be observed

## ***2.5 Diversification of iLiad into two language sets***

1. The iLiad **ER0100/002** for Latin countries (Western Europe, North & South America and Canada) with following languages: English, German, French and Dutch. Spanish will follow in a next release.
2. The iLiad **ER0100/010** for the Chinese market with following languages: Chinese and English
  - For the iLiad ER0100/002:  
The Chinese language is replaced by the French language
  - For the iLiad ER0100/010:  
Reduced number of downloads to install software updates (PDF and EBA viewers are now included in the download). Only one additional download required.

Note: The diversification of your iLiad is pre-defined and relates to the country where you purchased your device.

### 3 How to download and install the latest release?

In order to benefit from this release and any future software releases you will need to create a user account to connect to iDS. If you have an account, you can skip 3.1 and proceed to 3.2 “How to download and install the software release”.

#### 3.1 How to create an account

- Go to <https://myirex.irexnet.com/user.php> and fill in your e-mail address.
- You will receive an automatic e-mail with a password in your e-mail inbox.
- Configure the *iLiad Settings* on your iLiad and insert your e-mail address and the password you received.
- You are now ready to connect to iDS.

(Note: Make sure that your iLiad is fully charged or connected to the power plug before starting the download).

### **3.2 How to download and install the software release**

- Connect to the iDS by pressing the connect key of your iLiad for 2 seconds.
- You will be presented with the iLiad network profiles screen. Select to connect to iDS (using your stylus).
- After connecting to the server you will get a message: **Downloading Software Upgrade v2.10** and the progress of the download.
- When the download is complete the iLiad will install the update and restart itself.

Caution: Please make sure the iLiad is NOT **reset** while the new software is being installed. If the installation is interrupted at this stage, the iLiad may be programmed with incomplete software, rendering it unusable.

- The iLiad will automatically reconnect to the iDS and will download the updated **Reference Materials** and these **Release Notes**.
- When this download is complete you will return to the *Download History* and you can continue to work with your iLiad.

- You can verify the software version and identify the language set in the iLiad Settings menu title bar.
  - ER0100/002 for Latin countries
  - ER0100/010 for the Chinese market

## 4 Technical Support

If you experience problems with the installation please contact our Tech Support centre.
